1. This communication is in response to applicant's amendment received on

March 12, 2007.

2. Claims 1-12 are allowed.

3. The following is an examiner's statement of reasons for allowance: As

pointed out by the applicant, in the response filed on March 12, 2007, certain key

features of the claimed invention are not taught or fairly suggested by the prior

art. Specifically, the prior art fails to show a sensor-equipped antifriction bearing

with an outer ring, an inner ring and a resolver wherein the portion to be detected

of the resolver is integrally formed with the inner or outer ring member of the

bearing. Because none of the prior art teaches or suggests this element, this

feature, taken together with the other limitations of the claims renders the claims

allowable over the prior art.

4. Any comments considered necessary by applicant must be submitted no

later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."
